PRECAST CONCRETE SINKS,
FIREPLACE SURROUNDS & MORE

2020

A craftsman with dark hair, wearing a light-colored t-shirt and black gloves, is focused on working on a large, rough-textured concrete slab. He is using a flat tool to smooth or shape the surface. The background is a workshop with various tools and materials visible, including a green hose and a wooden structure.

{ CRAFTSMAN MADE }

Hard Topix is a team of dedicated professionals who design and fabricate sustainable lightweight concrete. Our proprietary mix design for concrete weighs roughly 25% less than traditional concrete, quartz or granite. Strength and durability are uncompromised, rendering a product that is built to last.

From color to detail finish, real quality is in our foundation. Each product receives the same care and attention to detail that can only be achieved through hand craftsmanship. This guarantees that every piece is truly unique.

We take pride in everything we do, which is why we hand build every piece that carries our name. And the moment you have a Hard Topix concrete product, you will understand why.

EXPLORE OUR CONCRETE SURFACES

SET UP A TRAINING TO LEARN MORE

Want to learn more about the different finishes and possibilities of concrete? Give us a call to set up a training at our facility or we can come to you!

Trainings are a great way to educate the design build industry with our unique process and concrete mix. Learn all the different possibilities and uses for precast concrete and how to spec it in your project. It's not your ordinary concrete so why not equip yourself with the latest and greatest?
